**Putting your knowledge
to action is Powerful.**

Get the information and
guidance you need with the
Wellness Screening Program.

1 SIMPLE ACTION

With all the health information coming at us today, it's hard to know where to start or what to trust. By taking **one simple action** — completing the Wellness Screening Program — you'll connect with the knowledge you need.

The Wellness Screening Program is a great place to start. Here's how it works...

- You give *less than 30 minutes of your time*.
- Your program includes:

Your Program Services:

- One simple blood draw that consists of 36 lab tests designed to detect disease or illness at the earliest stage
- A simple health risk questionnaire completed during your screening appointment to identify risk factors in your lifestyle
- Your blood pressure and body mass index (BMI)
- Educational summary report
- MyWellnessInfo.com health portal - support you can use when you choose to

Optional Services:

- **Seasonal Flu Shot** Participants must be 18 years of age or older and are subject to evaluation of health and medical history. Pregnant women in CA, DE, MO, NY, and WA are not eligible to participate in this flu vaccination program. State law prohibits pregnant women from receiving a flu shot containing Thimerosal.
- **PSA**, Prostate Specific Antigen, aids in the detection of benign and cancerous growth of the prostate
- **ColoCare®** take home self-test to detect hidden blood in the stool
- **Advanced Thyroid Screen** to determine thyroid function, includes TSH and Free T4
- **Additional test options announced during your registration and at your screening, ask a Wellness Inc. staff member to learn more**

BE PROACTIVE! GET A FLU SHOT

Flu Program is subject to vaccine availability. Participants must be 18 years of age or older and are subject to evaluation of health and medical history.

Pregnant women in CA, DE, MO, NY, and WA are not eligible to participate in this flu vaccination program. Laws in these states prohibit pregnant women from receiving a flu shot containing Thimerosal.

The H1N1 strain is included in this year's vaccine. Therefore, if you have had an H1N1 Flu shot in the last 28 days you should not be vaccinated at this time.
